

# **Factory Warranty**

**Global Hydronics warrants the furnace against corrosion and workmanship for a period of 20 years. The first 5 years we provide 100% coverage. The sixth year will be prorated to 80%, seventh year 60%, eighth year 40%, ninth year 30%, tenth year 20%, the eleventh to twentieth year 10%.**

**All electrical components and rear air tubes carry a one-year warranty.**

**Global Hydronics does not warrant against freezing, overheating, alterations to furnace, pressurizing, negligence, or the use of other fuel sources not certified for use with this unit. All transportation and installation costs are the responsibility of the customer and are not covered under warranty.**

**All furnaces must have rust inhibitor added to the water. It is imperative that the PH level in your furnace be kept between 9.5 – 10 at all times. It is mandatory to check levels at least twice a year. Once a month during heating season is highly recommended. If your PH is maintained at the proper level, corrosion cannot take place.**

**It is the responsibility of the owner to follow proper maintenance procedures as outlined in the operator's manual.**

**The above warranty is solely between the factory and the distributor or dealer. Any variation to this warranty, in whole or in part, is the responsibility of the distributor or dealer.**
